This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Valid after 1 year from test and date. Cannabinoid content of batch material may vary depending on sampling error. ND=Not Detected, QC=Quality Control, ND=Not Detected, NA=Not Analyzed, ppm=Parts Per Million, ppb=Parts Per Billion, Limit of Detection (LoD) and Limit of Quantitation (LoQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action Levels are State determined thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from QVAD Labs. This report is an QVAD Labs confidential. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Void where it says test not valid. Environmental control of which material may vary depending on sampling area. Environmental QC parameter. QC-After-control QC parameter. QC-not detected. QC-not analyzed. QC-works for Wilson. QC-works for Wilson. List of between QC and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. APC=Reproducibility of two measurements. Action Levels are EPA approved thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, copied or its entirety without written approval from EVIO Labs. This report is an analytical certification. The results shall only be for the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test and date. Controlled version of each material may vary depending on sampling error. If uncontrolled QC parameter, NC when controlled QC parameter. ND=Not Detected, N/A=Not Analyzed, comments for follow-up. For follow-up, please refer to the EVIO Labs of Detection (LUD) and/or LUD. Quantitative LUD are terms used to describe the standard concentration that can be reliably measured by an analytical procedure. 95%-Repeatability of two measurements. Actual levels are State determined thresholds for human safety for consumption under regulation.

This report shall not be reproduced, stored in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs verification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise, valid after 1 year from test and date. Confidential control of batch material may vary depending on sampling error. Qualitative (C/G) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. EVIO Labs is not responsible for any third-party results. Adverse events are those adverse events that are reported to the FDA for human safety, for consumption and/or inhalation.

Cannabinoid content of batch material may vary depending on sampling error. IC=In-house QC parameter, NC=Non-controlled QC parameter, ND=Not Detected, ND=Not Analyzed, ppm=Parts Per Million, ug/g=Parts Per Billion, Limit of Detection: 0.001 and Limit of Quantitation: 0.003 are limits used to describe the smallest concentration that can be reliably measured by an analytical procedure. ND=Representability of two measurements, below levels are State determined thresholds for human safety for consumption under inhalation.

\*This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Not valid 1 year from test and date. Cannabinoid content of batch material may vary depending on manufacturing process. If individual QC parameters, Microbial-controlled QC parameters, ND=Not Detected, Blanket Analysis, ppm=parts per million, ppb=parts per billion, ug/g of substance (LALR and LALR-CP). Quantitative (u/g) are terms used to describe the chemical concentration that can be reliably measured by an analytical procedure. ND=Representative of two measurements. Action Levels are State determined thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. This results are confidential unless explicitly stated otherwise. Void after 1 year from test and date. Environmental control of such material may vary depending on sampling error. IC=In-house QC parameter, NC=Not-considered QC parameter, ND=Not Detected, Not-Not Analyzed, appropriate for within appropriate for within limits of detection (LOD) and limit of quantitation (LOQ) are being used to describe the results (concentration) that can be reliably measured by an analytical procedure. ND=Not detectable at low enough levels. All test levels are state determined thresholds for human safety for consumption and/or inhalation.
