This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Valid for 1 year from test end date. Considered content of batch material may vary depending on sampling error. KC=In-control QC parameter, NC=Not-controlled QC parameter, ND=Not Detected, NA=Not Analyzed, ppm=Parts Per Million, ppb=Parts Per Billion, Limit of Detection (LoD) and Limit of Quantitation (LoQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action levels are State determined thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly agreed otherwise. Valid after 1 year from test result date. Cannabinoid content of each product may vary depending on sampling error. ND=Not Detected, QC parameter, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected. Quantities (ND) are listed to describe the smallest concentration that can be reliably measured by an analytical procedure. ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected, ND=Not Detected. State determined thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, copied or its contents without written approval from H&M Labs. This report is an H&M Labs certification. The results apply only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test end date. Conditional values of each material may vary depending on sampling point. K=Control DC parameter, HC=Non-controlled DC parameter, ND=Not Detected, M=Not Analyzed, parameters Per Milion, parts Per Billion, parts Per Trillion, Limit of Detection South and West of Queensland L&H are here used to draw the greatest concentration that can be reliably measured by an analytical procedure. MD=Reproducibility of test measurements. Actual levels are those determined traceable to human safety for consumption under intended.

This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Void after 1 year from test and date. Cannabinoid content of bulk material may vary depending on sampling error. Evio control-QC parameters, ND=not-controlled QC parameters, ND=not detected, not-not-analyzed, same-parts for 1000g, app=parts per billion, limit of detection (LOD) and limit of quantitation (LOQ) are listed used to describe the smallest concentration that can be reliably measured by an analytical procedure. FPO=representability of two measurements. Action Levels are data generated thresholds for further safety for consumption and/or evaluation.

This report shall not be reproduced, stored in a retrieval system, without written approval from TNO-Labo. This report is an TNO-Labo certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Not after 1 year from test and data. Limitations: number of TNO-Labo material may vary depending on sampling error. 1 = no control QC parameter, 2 = 100% controlled QC parameter, 3 = 100% detected, 4 = 100% analyzed, 5 = 100% for 100%, 6 = 100% for 100%, 7 = 100% for 100%, 8 = 100% for 100%, 9 = 100% for 100%, 10 = 100% for 100%, 11 = 100% for 100%, 12 = 100% for 100%, 13 = 100% for 100%, 14 = 100% for 100%, 15 = 100% for 100%, 16 = This report shall not be reproduced, stored in a retrieval system, without written approval from BMD Labs. This report is an ISO 9001 certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly waived otherwise. Not after 1 year from test end date. Limitations: content of BMD materials may vary depending on sampling error, I=non-control QC parameter, NC=Non-controlled QC parameter, N=Not Detected, M=Not Analyzed, ppm =parts per Million, ppb=Parts Per Billion, Limit of Detection LUD, and level of Detection LOD go terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. BMD-dependability of test measure units. Action Levels are State-mandated thresholds for human safety for occupational and/or consumer.

This report shall not be reproduced, unless in its entirety, without written approval from CytO Labs. This report is an CytO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test and date. Correlation correct within material may vary depending on sampling error. Evaluation: QC parameter, NO-true-controlled QC parameter, NO-true detected, NO-true Analyzed, good-parts for Billon, good-parts for Billon. List of detection limit and limit of quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. APC=Acceptability of two measurements. Action Levels are state designated thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless it is in writing, without written approval from TACO Labs. This report is an TACO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test and date. Confidential content of search material may vary depending on sampling unit. K=Control QC parameter, NC=Not controlled QC parameter, ND=Not Detected, NA=Not analyzed, ppm=Parts Per Million, ppb=Parts Per Billion. Limit of Detection built into level of Quantitation (LOQ) are listed, used to describe the smallest concentration that can be reliably measured by an analytical procedure. 95% dependability of test measurements. Action levels are those determined desirable for human safety for consumption and/or release.

Lab Director

This report shall not be reproduced, unless in its entirety, without written approval from TNO Labs. This report is an TNO Labs contribution. The results relate only to the material or product analyzed. Test results are confidential unless explicitly agreed otherwise. Valid after 1 year from test end date. Commented content at each matter of why vary depending on sampling error. Evaluation of parameter, HC-also-evaluation of parameter, HD-also-evaluation, HCN-also-analyzed, HCN-also-analyzed, Dose-also-the follow-up, also-the follow-up, Limit at Detection LUD and LOD of Quantifier LUD are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. HD = Hazardability of toxic substances. Action levels are valid determined thresholds for human safety for consumption under intake.

This report shall not be reproduced, unless it is entirely without written approval from GHD Ltd. This report is an GHD Ltd. certification. The results relate only to the material or product analysed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test and date. Comments: content of table evaluated may vary depending on sampling error. C=Controlled QC parameter, NL=Non-controlled QC parameter, ND=Not Detected, NA=Not Analysed, g/g=grams per 100gms, g/gg=grams per 1000gms, Level of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action Levels are those determined desirable for human safety for consumption and/or ingestion.

This report shall not be reproduced, written in its entirety, without written approval from EVID Labs. This report is an EVID Labs certification. The results relate only to the material or product analyzed. The results are confidential prices legally waived information. Not after 1 year from test and date. Carried out control of each material may vary depending on sampling error. It is advised QC personnel. Not allow controlled (3) parameters. Not allow detected. Not allow analyzed. give status for within 48 hours for the within 1 year of detection. S422 and 4201.02 Quantitation L200 are forms used to describe the smallest concentration that can be reliably measured by an analytical procedure. L200-Representability of two mass fractions. Action Levels are data dependent. Evaluate for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from InterMatrix. This report is an InterMatrix contribution. The results relate only to the material as tested and analyzed. Test results are confidential unless explicitly stated otherwise. We offer 1 year free test and data. Composites content of each material may vary depending on sampling area. Q-Controlled (QC) parameter, NL=Not Controlled (NC) parameter, ND=Not Detected, NA=Not Analyzed, ppm=Parts Per Million, gpa=Parts Per Billion, units of detection (u.d.) and units of Quantitative (u.Q.) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. BFD=Reproducibility of two measurements. Actual levels are fully determined. Available for human safety for construction and/or release.

This report shall not be reproduced, unless in its entirety, without written approval from CARG Labs. This report is an CARG Labs contribution. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test date. Uncontrolled content of each material may vary depending on sampling error. If no control QC parameter, MC when controlled QC parameter. All test performed, report analyzed, post-works for follow, plus Perry for follow, Lab of Detection LNC, and Limit of Quantitation (LOQ) are listed used to describe the smallest concentration that can be reliably measured by an analytical procedure. MDL =Repeatability of two measurements. Action Levels are State determined thresholds for human safety by consumption under isolation.

This report shall not be reproduced, unless in its entirety, without written approval from EVIO Labs. This report is an EVIO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test and date. Cannabinoid content of batch material may vary depending on sampling error, it is a control QC parameter. ND=Not Detected, ND=Not Analyzed, ppm=Parts Per Million, mg=Milligrams, g=Grams, Limit of Detection (LoD) and Limit of Quantitation (LoQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD=Reproducibility of two measurements. Action Levels are state determined thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from ICHT rules. This report is an ICHT rules certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Valid after 1 year from test end date. Consistent number of repetitions unless very very dependent on sampling error. σ -value (QC parameter, MC when controlled QC parameter, MC when indicated, NA when analyzed, power/shock repetition, ppm=Parts Per Billion, Last of division (LSD) and level of (LOD) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. σ -value=variability of two measurements. Action levels are those determined themselves for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from PVD Labs. This report is an PVD Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise. Void after 1 year from test and date. Environmental control of each material may vary depending on sampling time. Environmental QC parameter, MC value-controlled QC parameter, lot/lot Selected, lot-not analyzed, parts/Parts Per Million, gpb/Parts Per Million, Limit of Detection (LoD) and Limit of Quantitation (LoQ) are terms used to describe the smallest concentration that can be reliably measured by an analytical procedure. (PPO)-Reproducibility of two measurements. Action Levels are those concentrations thresholds for human safety for consumption and/or inhalation.

This report shall not be reproduced, unless in its entirety, without written approval from ECHO Labs. This report is an ECHO Labs certification. The results relate only to the material or product analyzed. Test results are confidential unless explicitly stated otherwise, valid after 1 year from test and date. Unrequested contact of third material may vary depending on sampling error. ECHO Labs: QC parameter, MC - Mass controlled QC parameter, MD - Not Detected, ND - Not Detected, 2000 - Parts per million, 1000 - Parts per billion, LOQ - Limit of Detection, LOQ and LOD - Quantitation LOQ are limits used to describe the smallest concentration that can be reliably measured by an analytical procedure. RPD - Reproducibility of two measurements. Actual levels are those determined through the human safety for consumption and/or inhibition.
